

Skills-On-The-Go™ for a workforce On the go

- ★ Increase Knowledge Retention By Up To 170%
- ★ Drive adoption by up to 90% through gamification
- ★ Just 3 minutes, 3 times a week on scenario based challenges on tablet or smartphone

Skills-On-The-Go™ fits a host of learning delivery needs:

- ◆ Post-training: Increase retention by up to 170% and drive 90%+ completion rates
- ◆ Pre-training: Use the results to target topics & teams
- ◆ Live training: Release questions and notifications “on demand”
- ◆ Refresher learning: Cost effective way to improve retention
- ◆ Onboarding: Complement and enhance new hire onboarding experience

Does it feel like your sales executives forget what they learn in workshops and training sessions almost as fast as they finish them? Even if they pass a post-training evaluation. All that time and money spent to help them improve their performance seem to just disappear into thin air. You have to ask, do they remember what they learned when they are back in their roles? Do they really get it? Do they apply it?

Skills-on-the-Go™ powered by Qstream, is tested and proven to increase training retention by up to 170%! It is based on a patent-pending learning technology developed at Harvard to increase retention and change behaviour. Your team members take three minutes every other day to complete a simple, scenario-based challenge on their tablets or smartphones. The proprietary adaptive learning algorithm changes the content automatically to drive long-term learning retention. Built-in game mechanics drive outstanding completion rates so users are engaged and their skills stays sharp.

Need learning metrics?

Skills-on-the-Go™ gives you real-time tracking to see who knows what – and who needs assistance. You can report and analyze the data at individual, branch, district, region and country levels in real time and view the data in a metrics dashboard.
